***Drawings Notice***

Applicant is hereby notified that the required timing for the correction of drawings has changed. See the last 6 lines on the sheet which is attached entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)".

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a method for generating and storing characterized data, classified in class 395, subclass 500.23.
- II. Claims 16-30, drawn to a method for molecular structure alignment determination, classified in class 702, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are different and distinct in the manner that their steps of methodology are different. Group I is a method concentrated upon the action of generating and storing data while Group II is a method concentrated upon the action of alignment determination which require specific criterion functions to be carried out.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1631

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
